LED : light goes up each finger

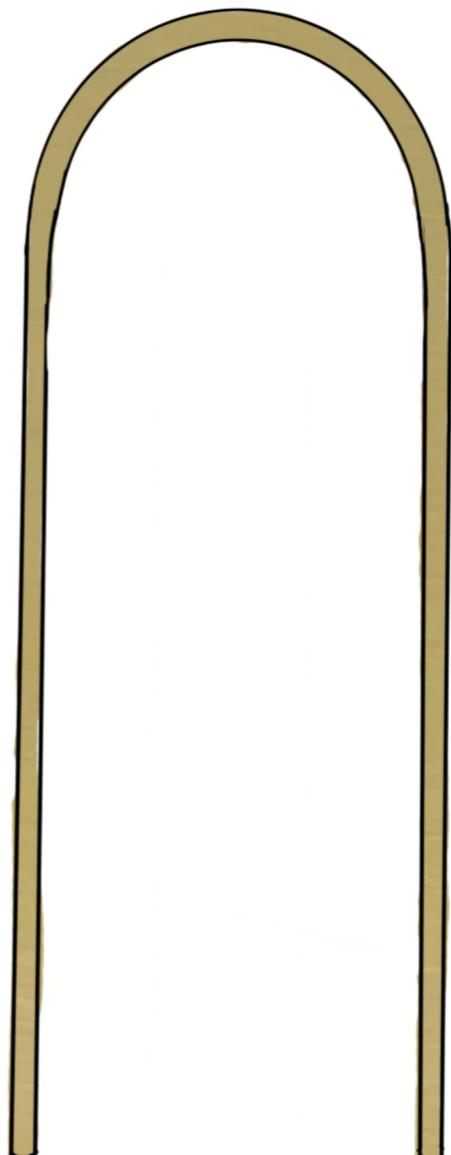

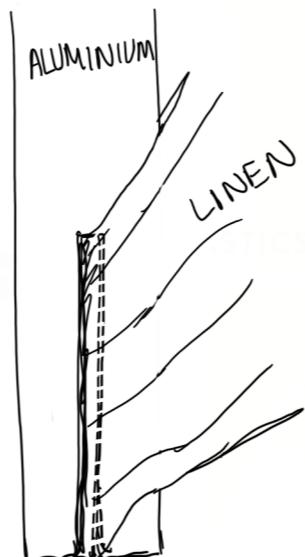

POSSIBLE CHANGES:

- DIFFERENT PROPORTIONS
OF FRAME
- TRY OUT DIFFERENT COLOURED
LINEN
- DIFFERENT BASE SHAPES &
SIZES
- DIFFERENT POSITIONS OF THE LINEN
ON THE FRAME

GOLD ANODISED
ALUMINIUM

OLIVE
GREEN
LINEN ↗

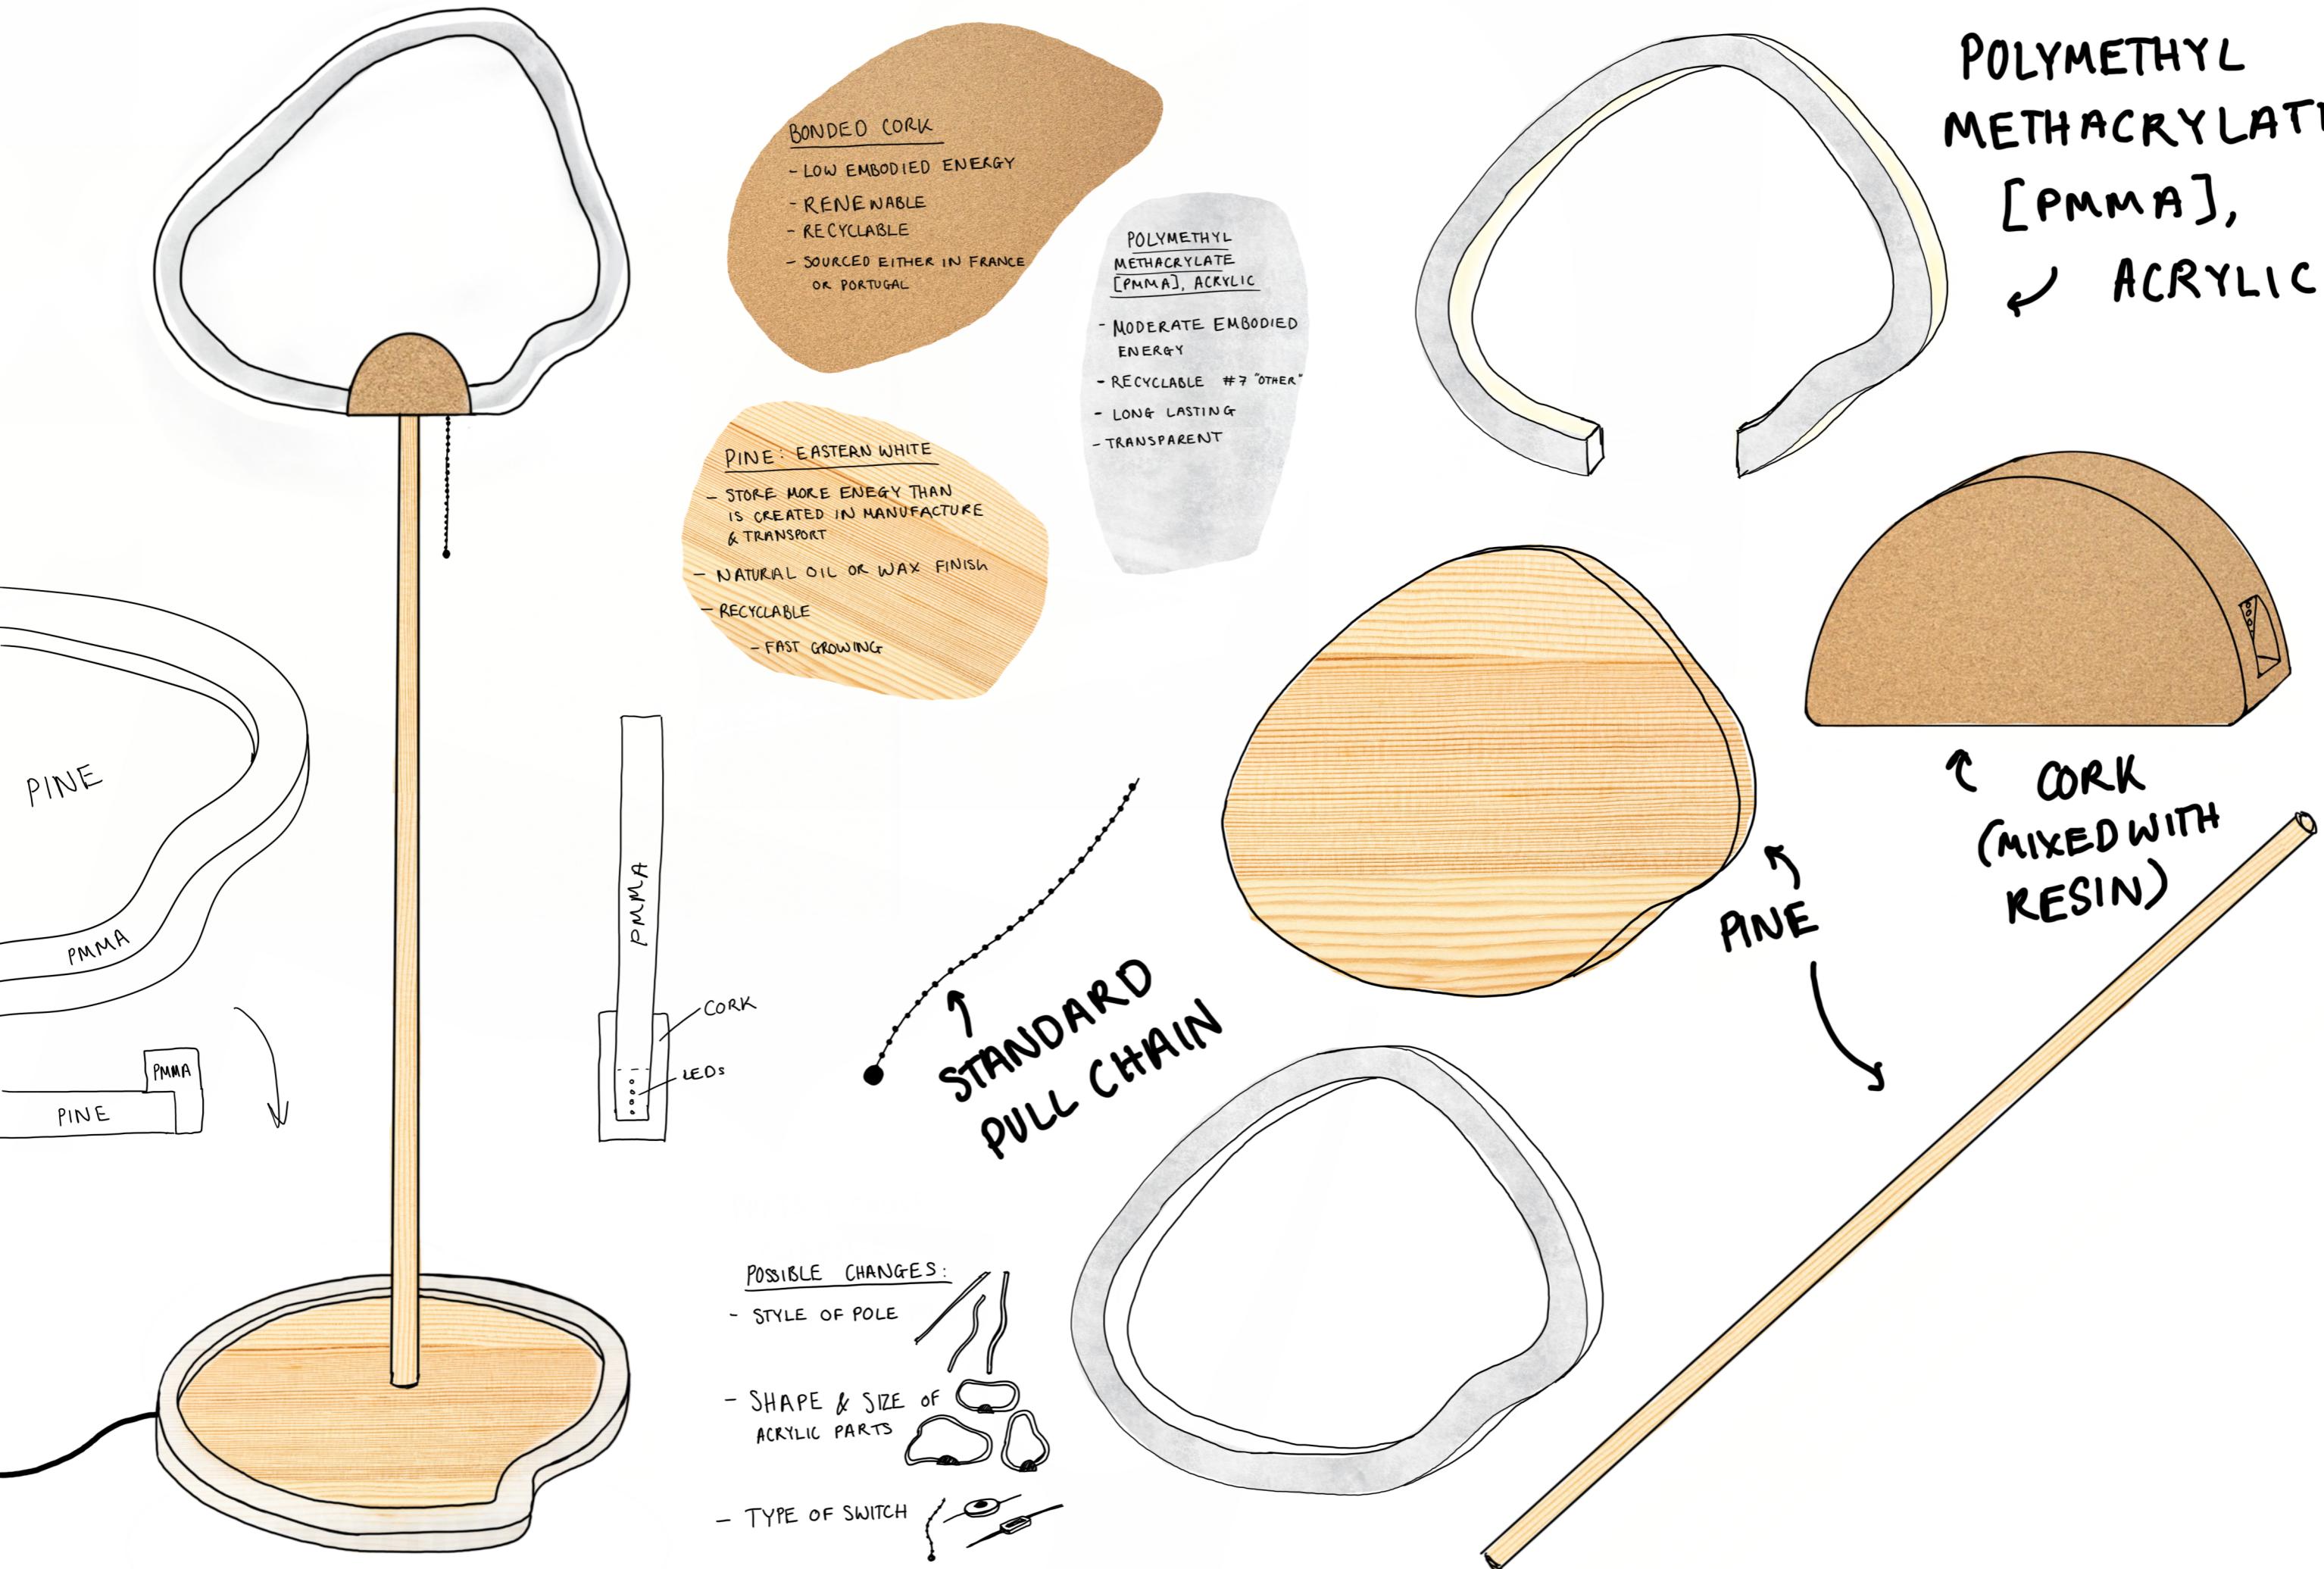

YELLOW ANODISED ALUMINIUM

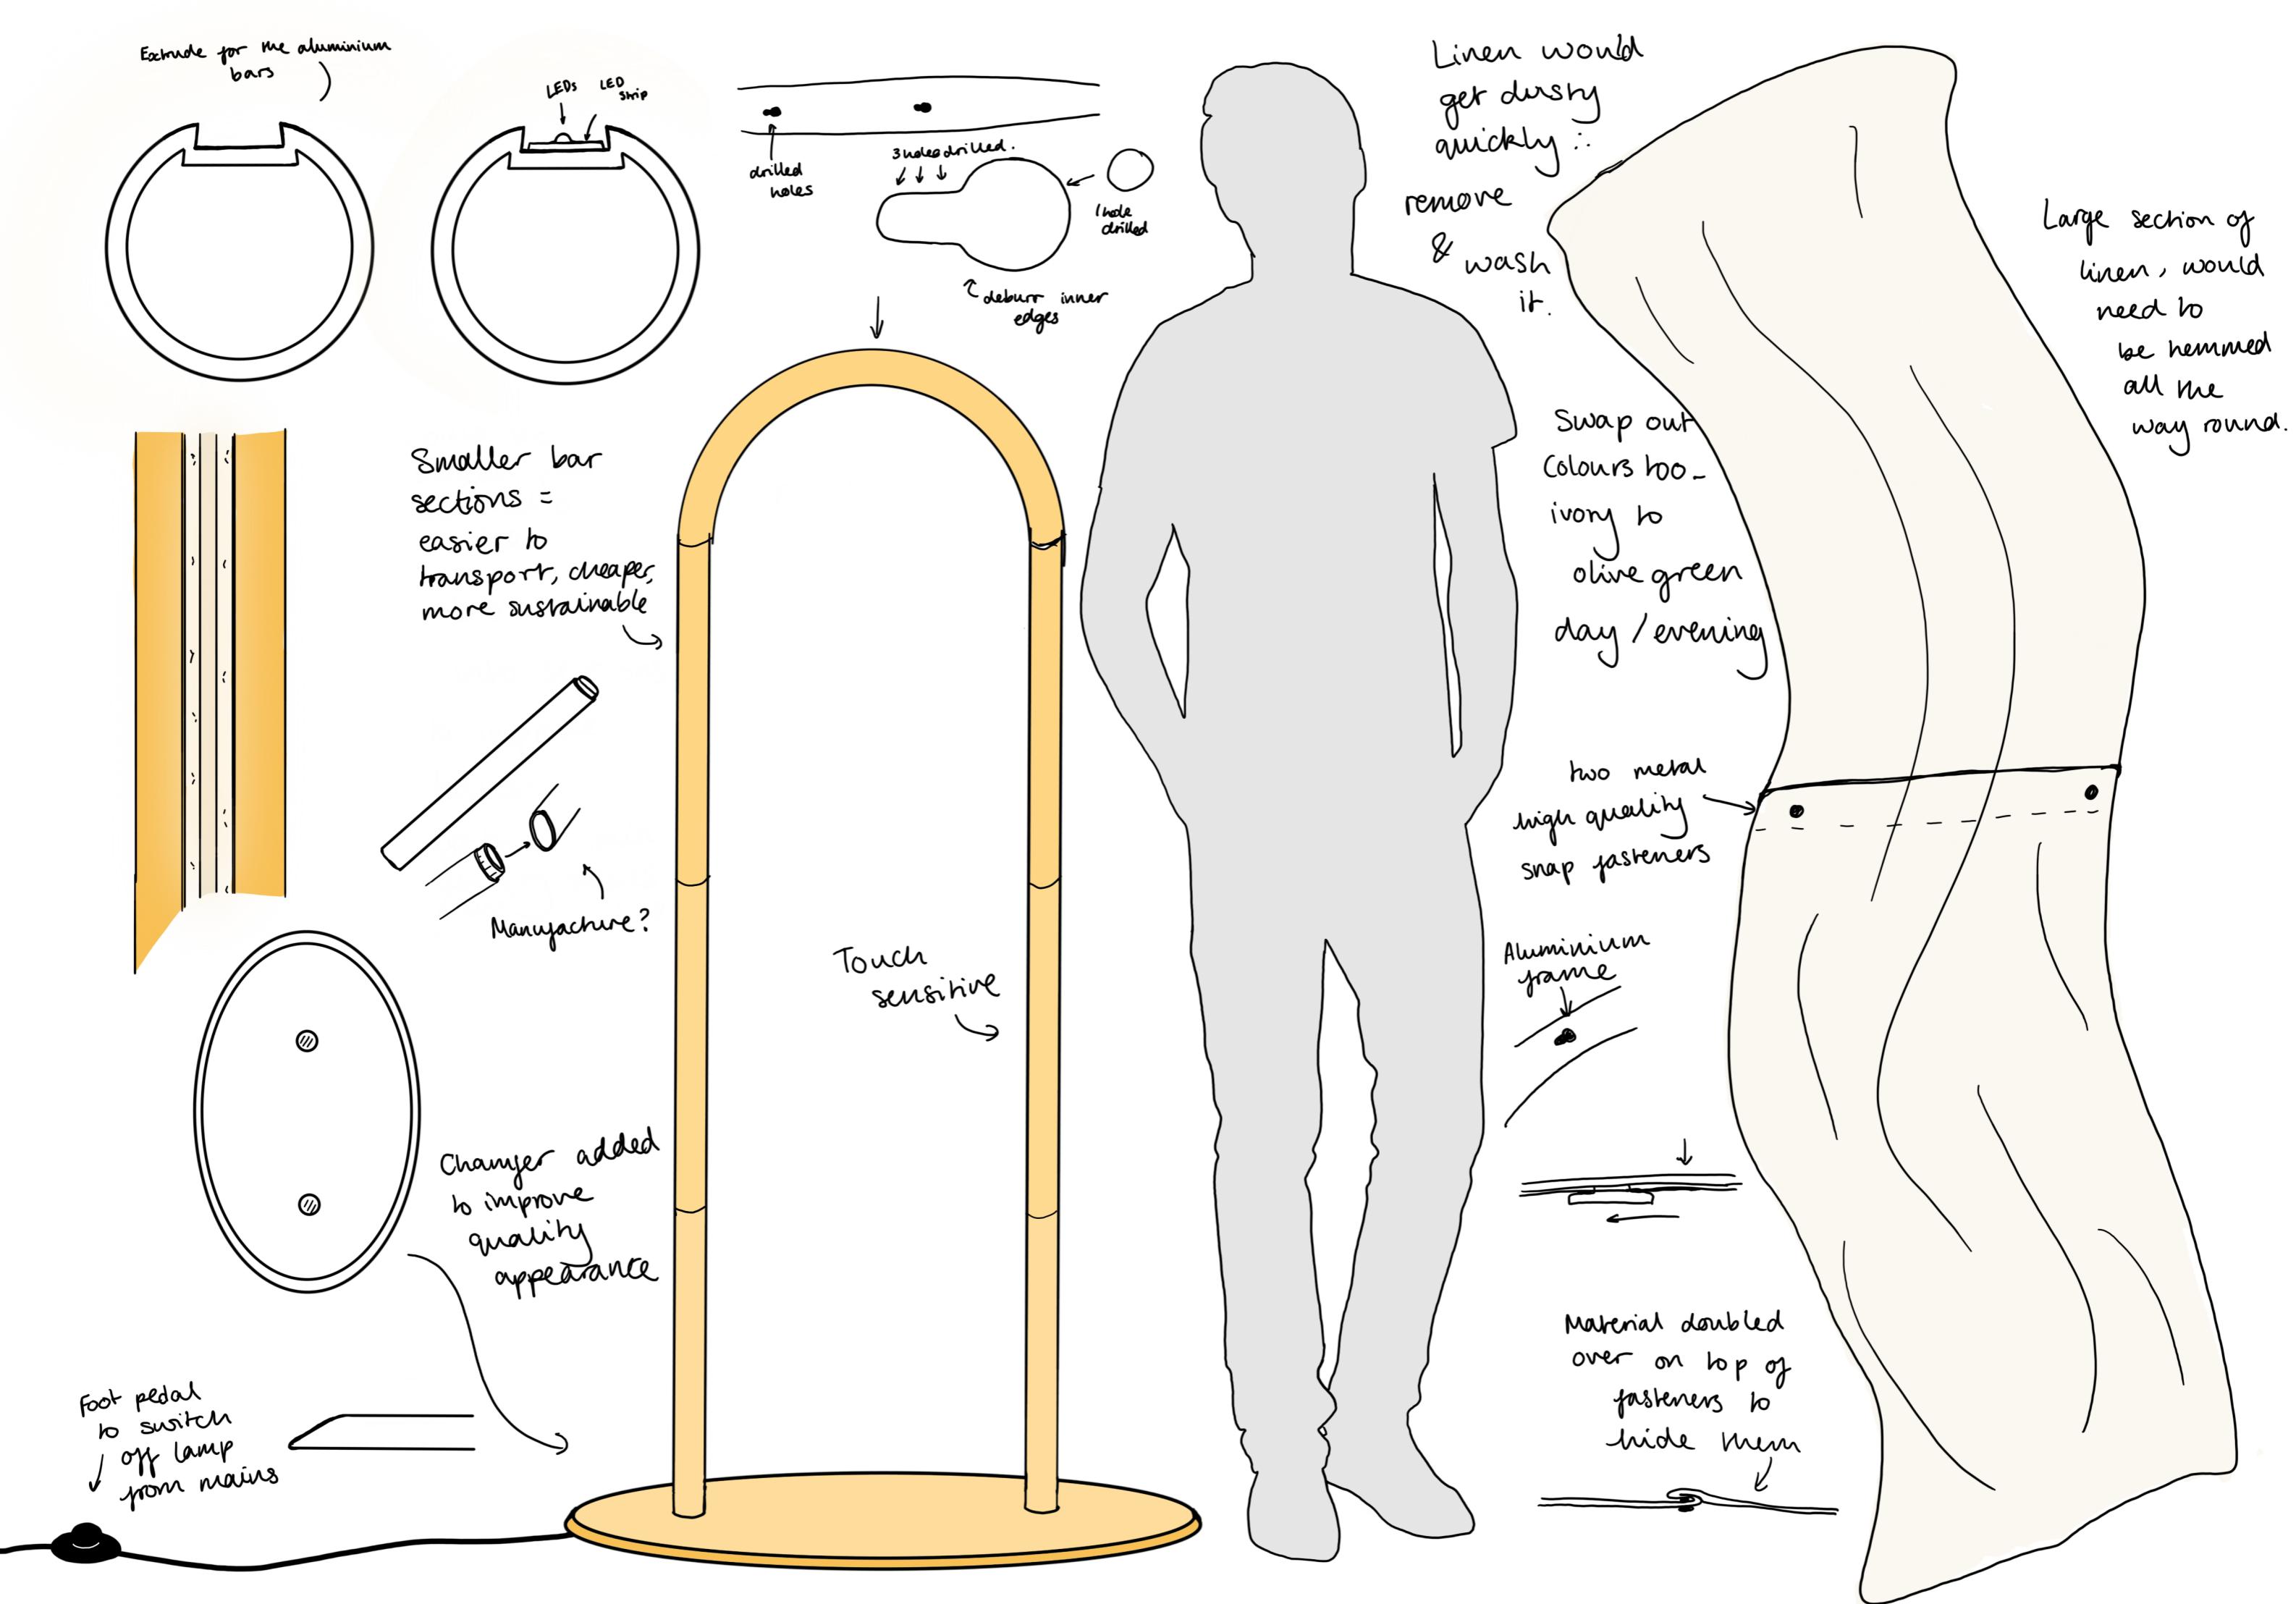

- EFFICIENT TO
RECYCLE
- LIGHT-WEIGHT ::
REDUCED TRANSPORT
FUEL COSTS
- THERMAL RESISTIVITY
- GOOD AESTHETIC
QUALITIES

OLIVE GREEN LINEN

- NATURAL & RENEWABLE
- FEW/NO PESTICIDES or FERTILIZER
REQUIRED FOR GROWING FLAX
- DYED WITH NATURAL DYES
- STRONG
- GROWN IN IRELAND, FRANCE
& BELGIUM
- LIGHTWEIGHT

POLYMETHYL METHACRYLATE [PMMA], ↔ ACRYLIC

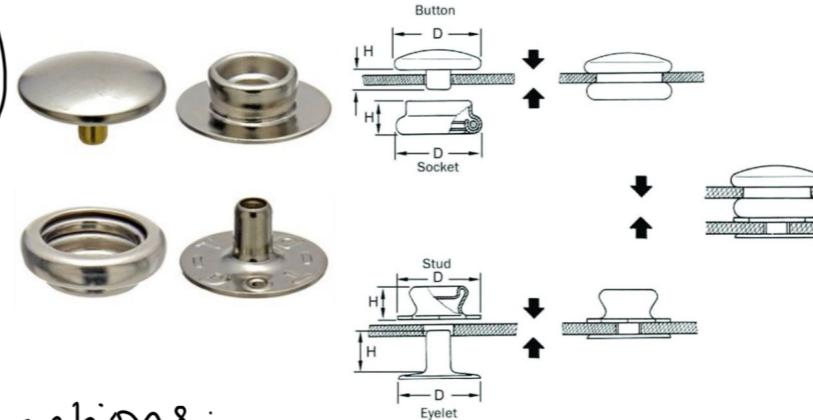

Different method of hiding the fasteners:

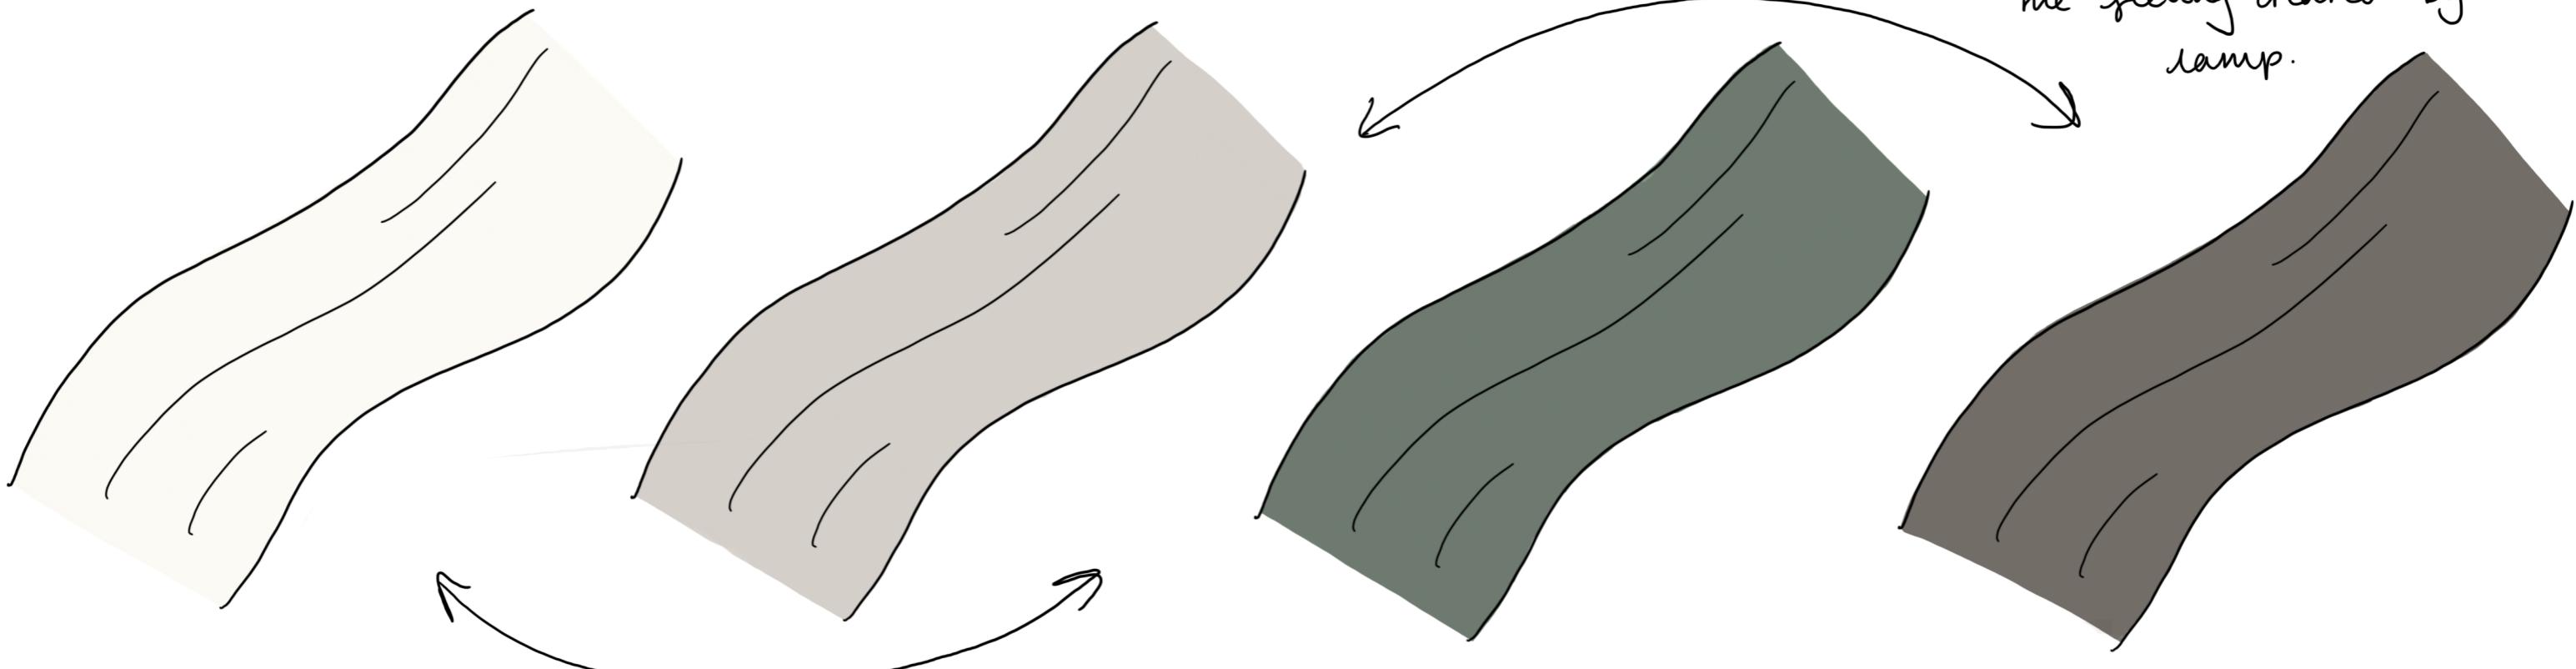

linen folded along central strip
sewn down at ↓'s
hides the
fasteners
whilst looking
subtle

will give the linen more
movement and glow

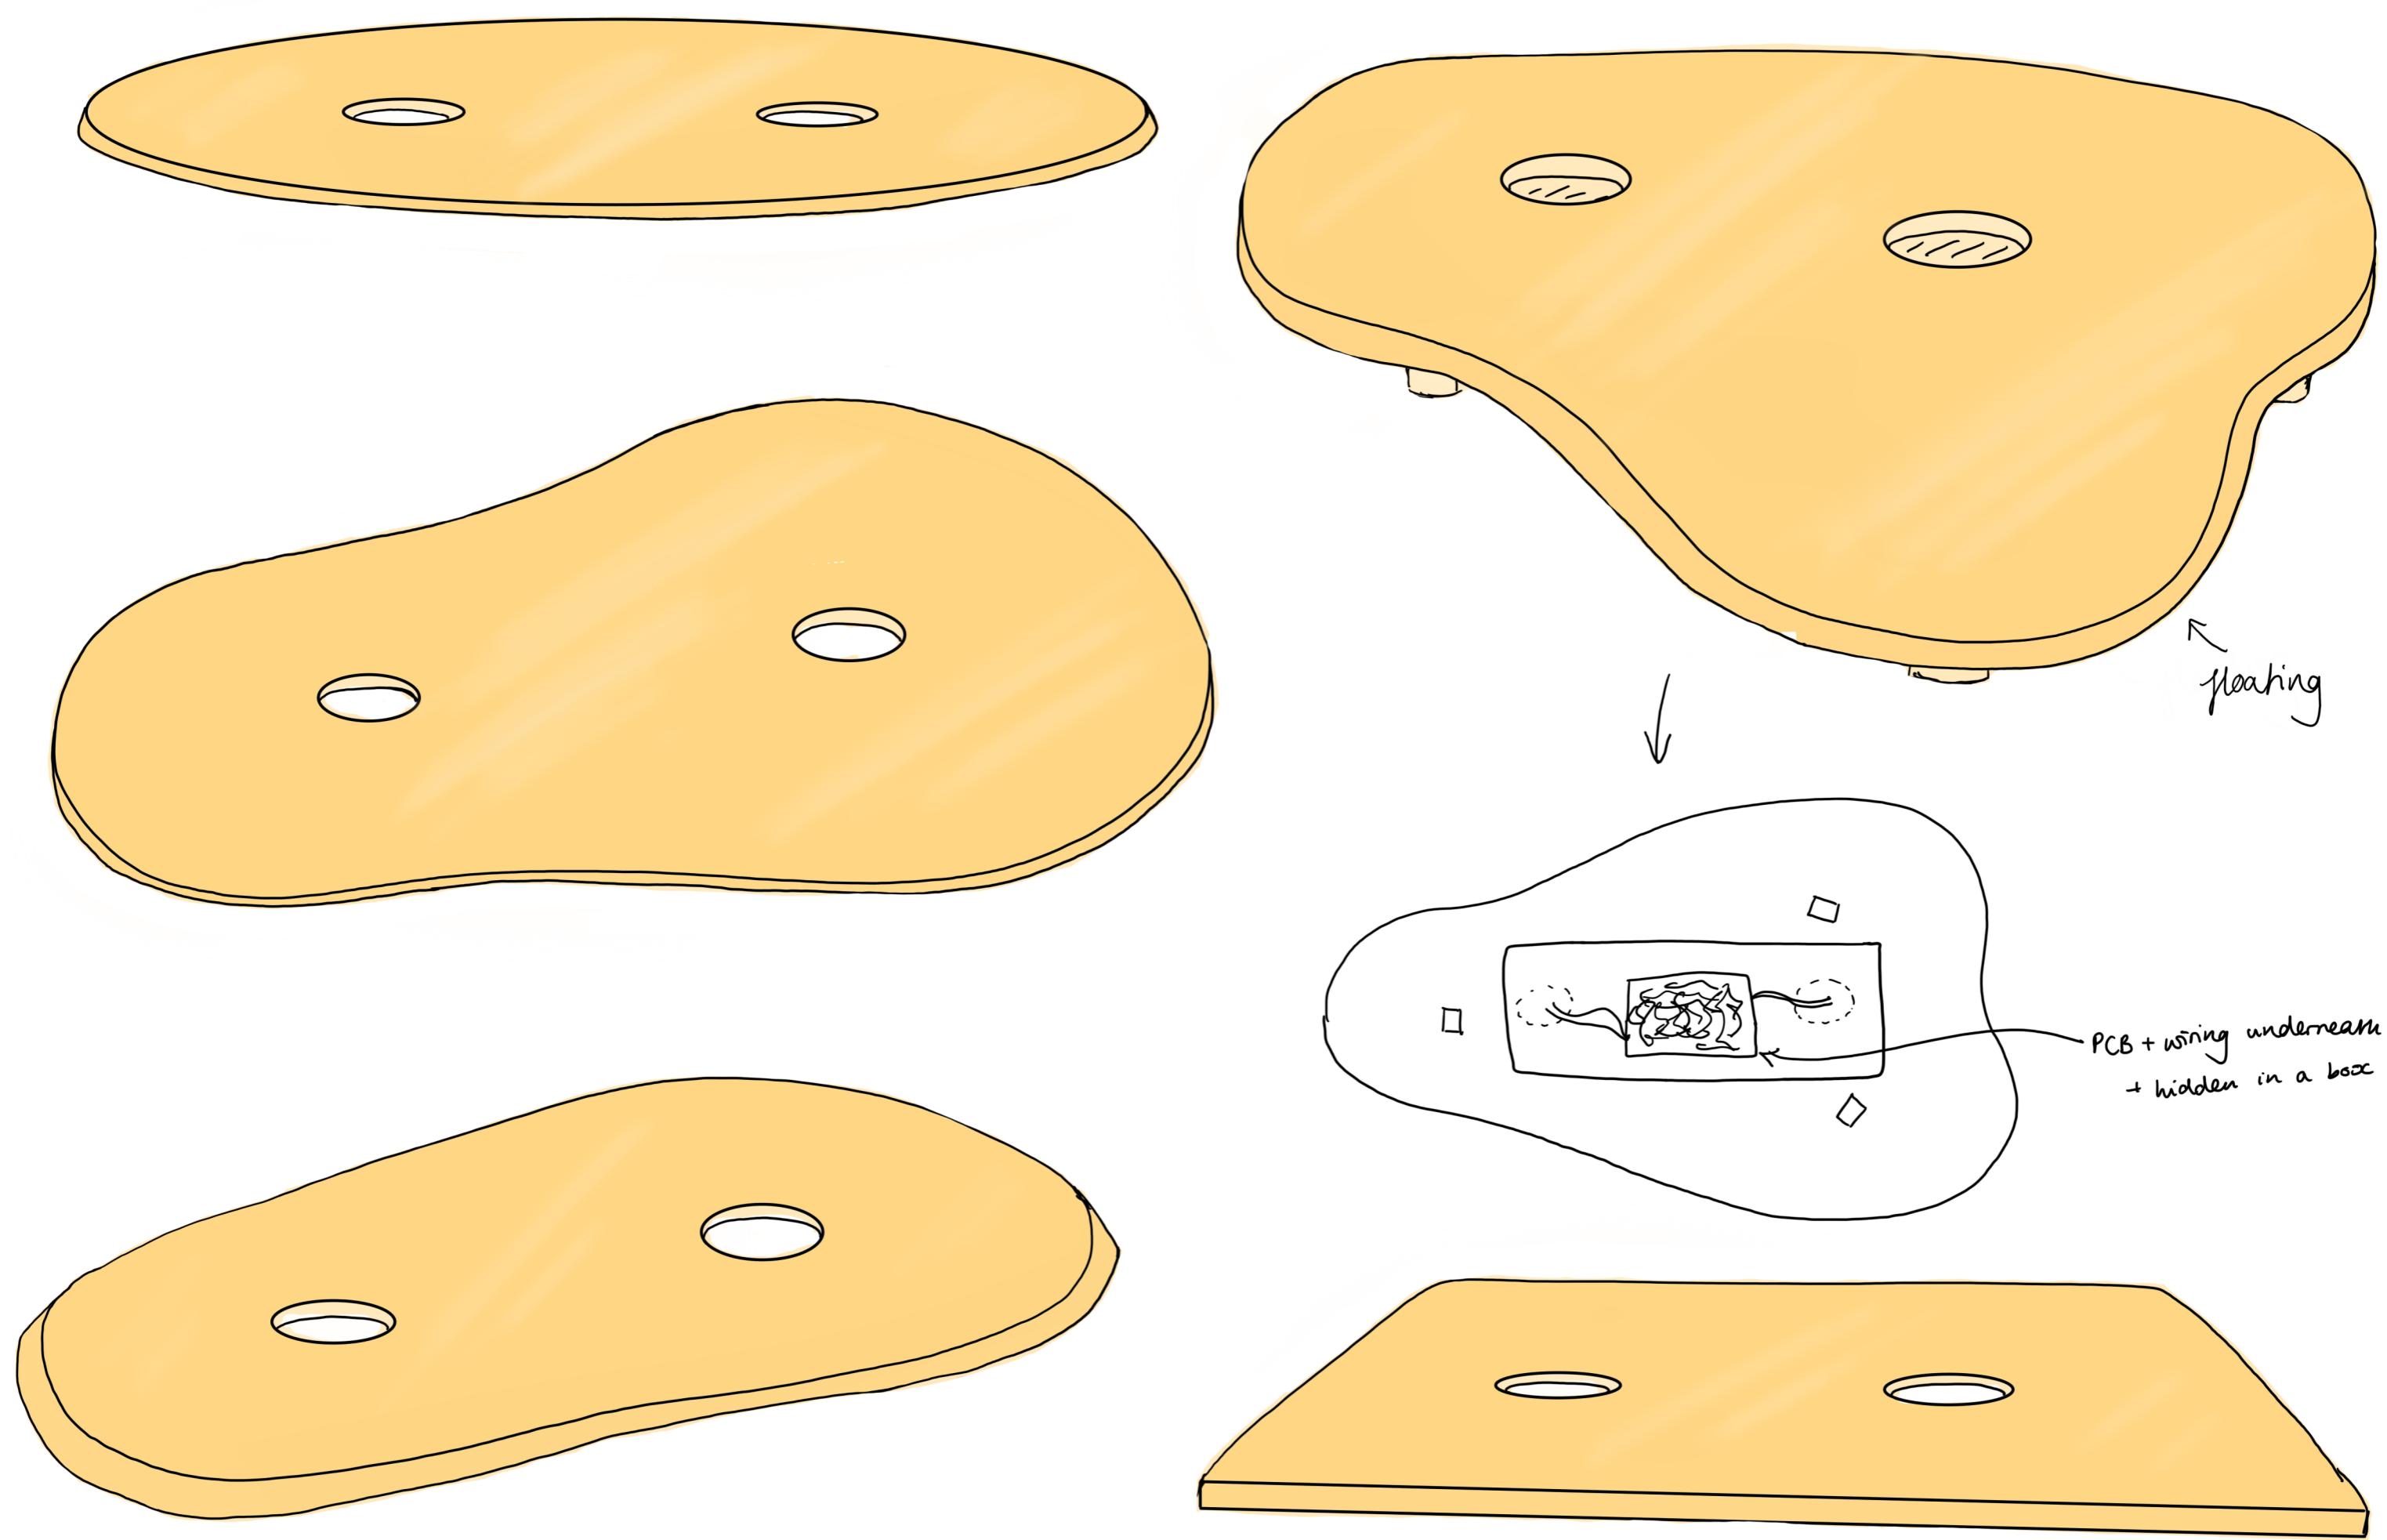

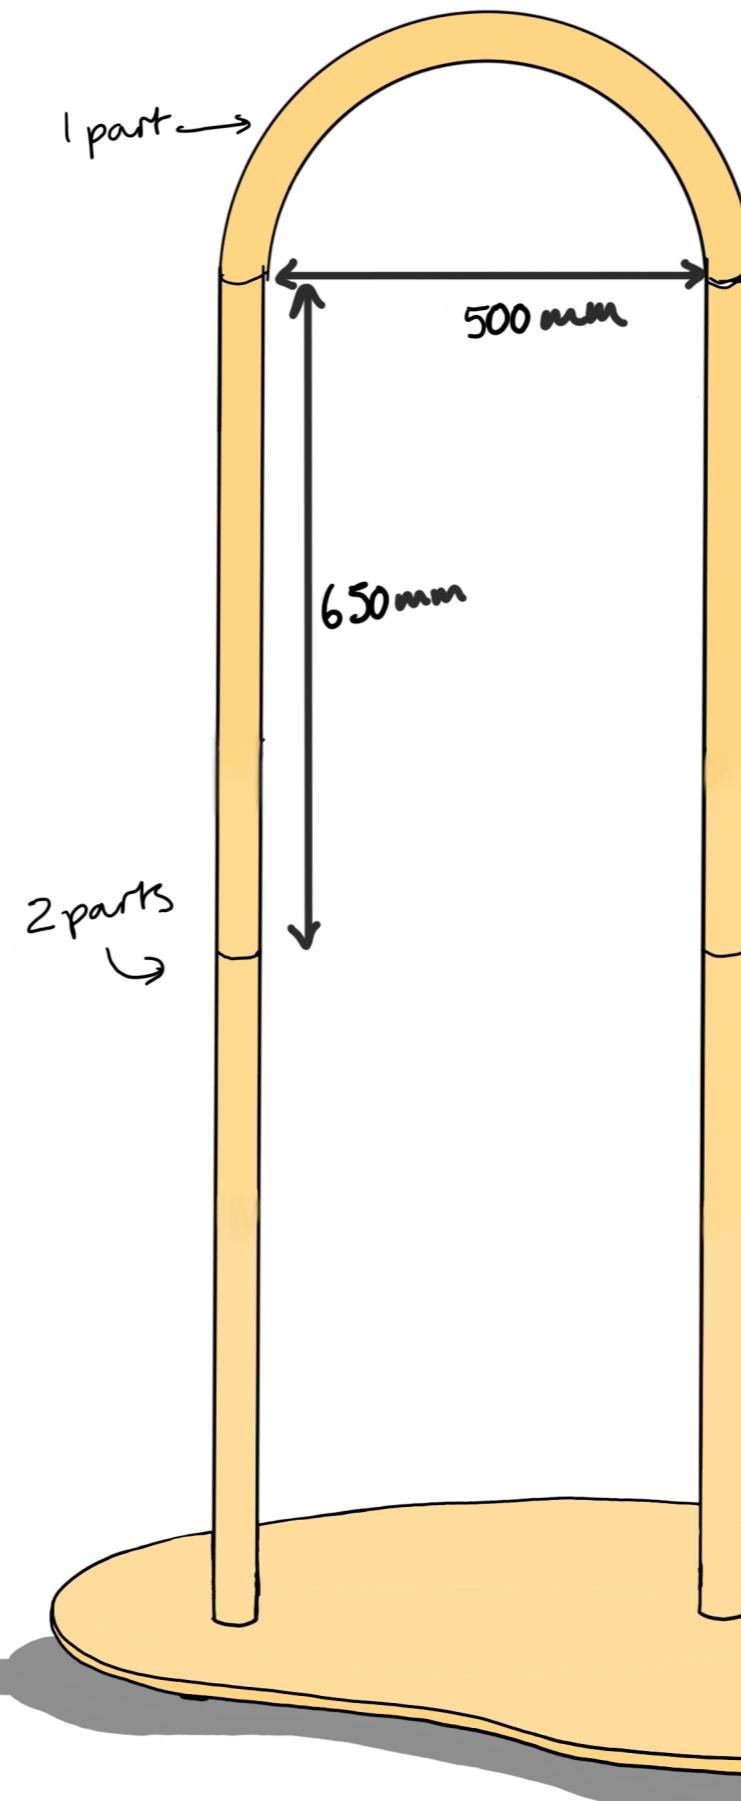

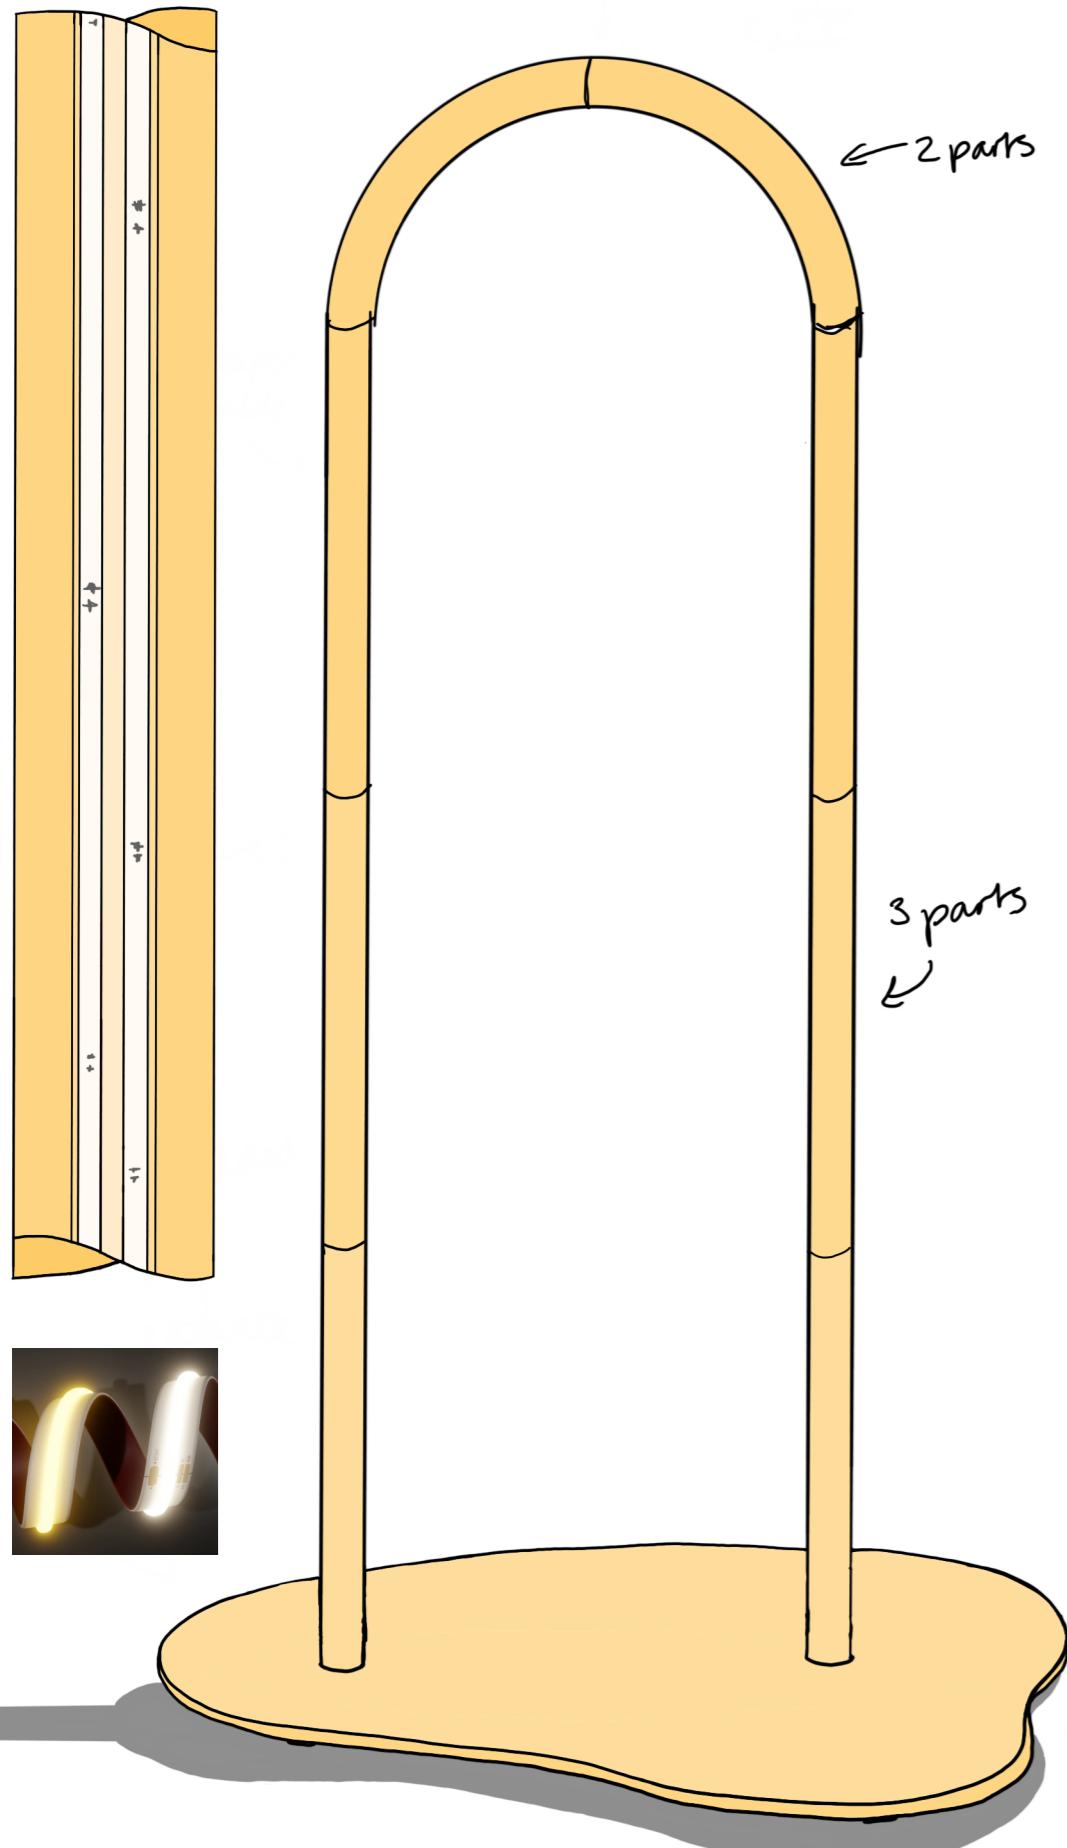

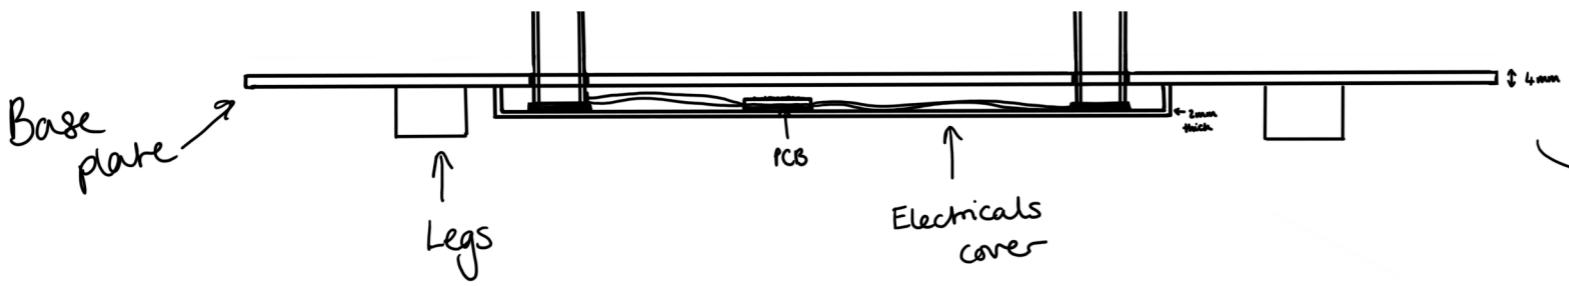

Customers could choose between
1 and 4 linens to purchase
with the frame, that
way allowing them
to use one whilst
another is being washed,
and to have more control over
the feeling created by the
lamp.

Colour options:

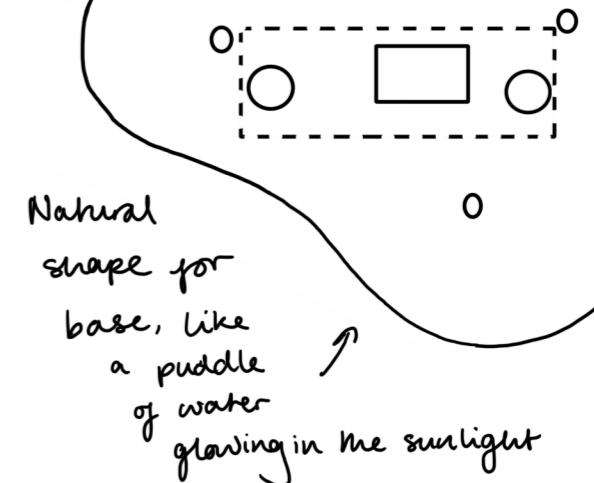

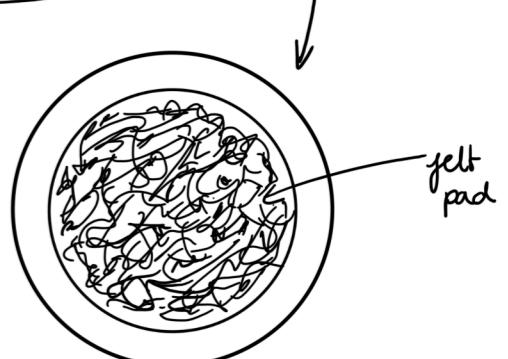

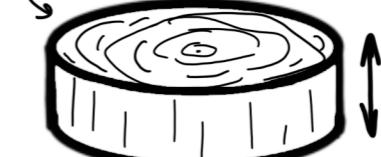

suggested
combinations

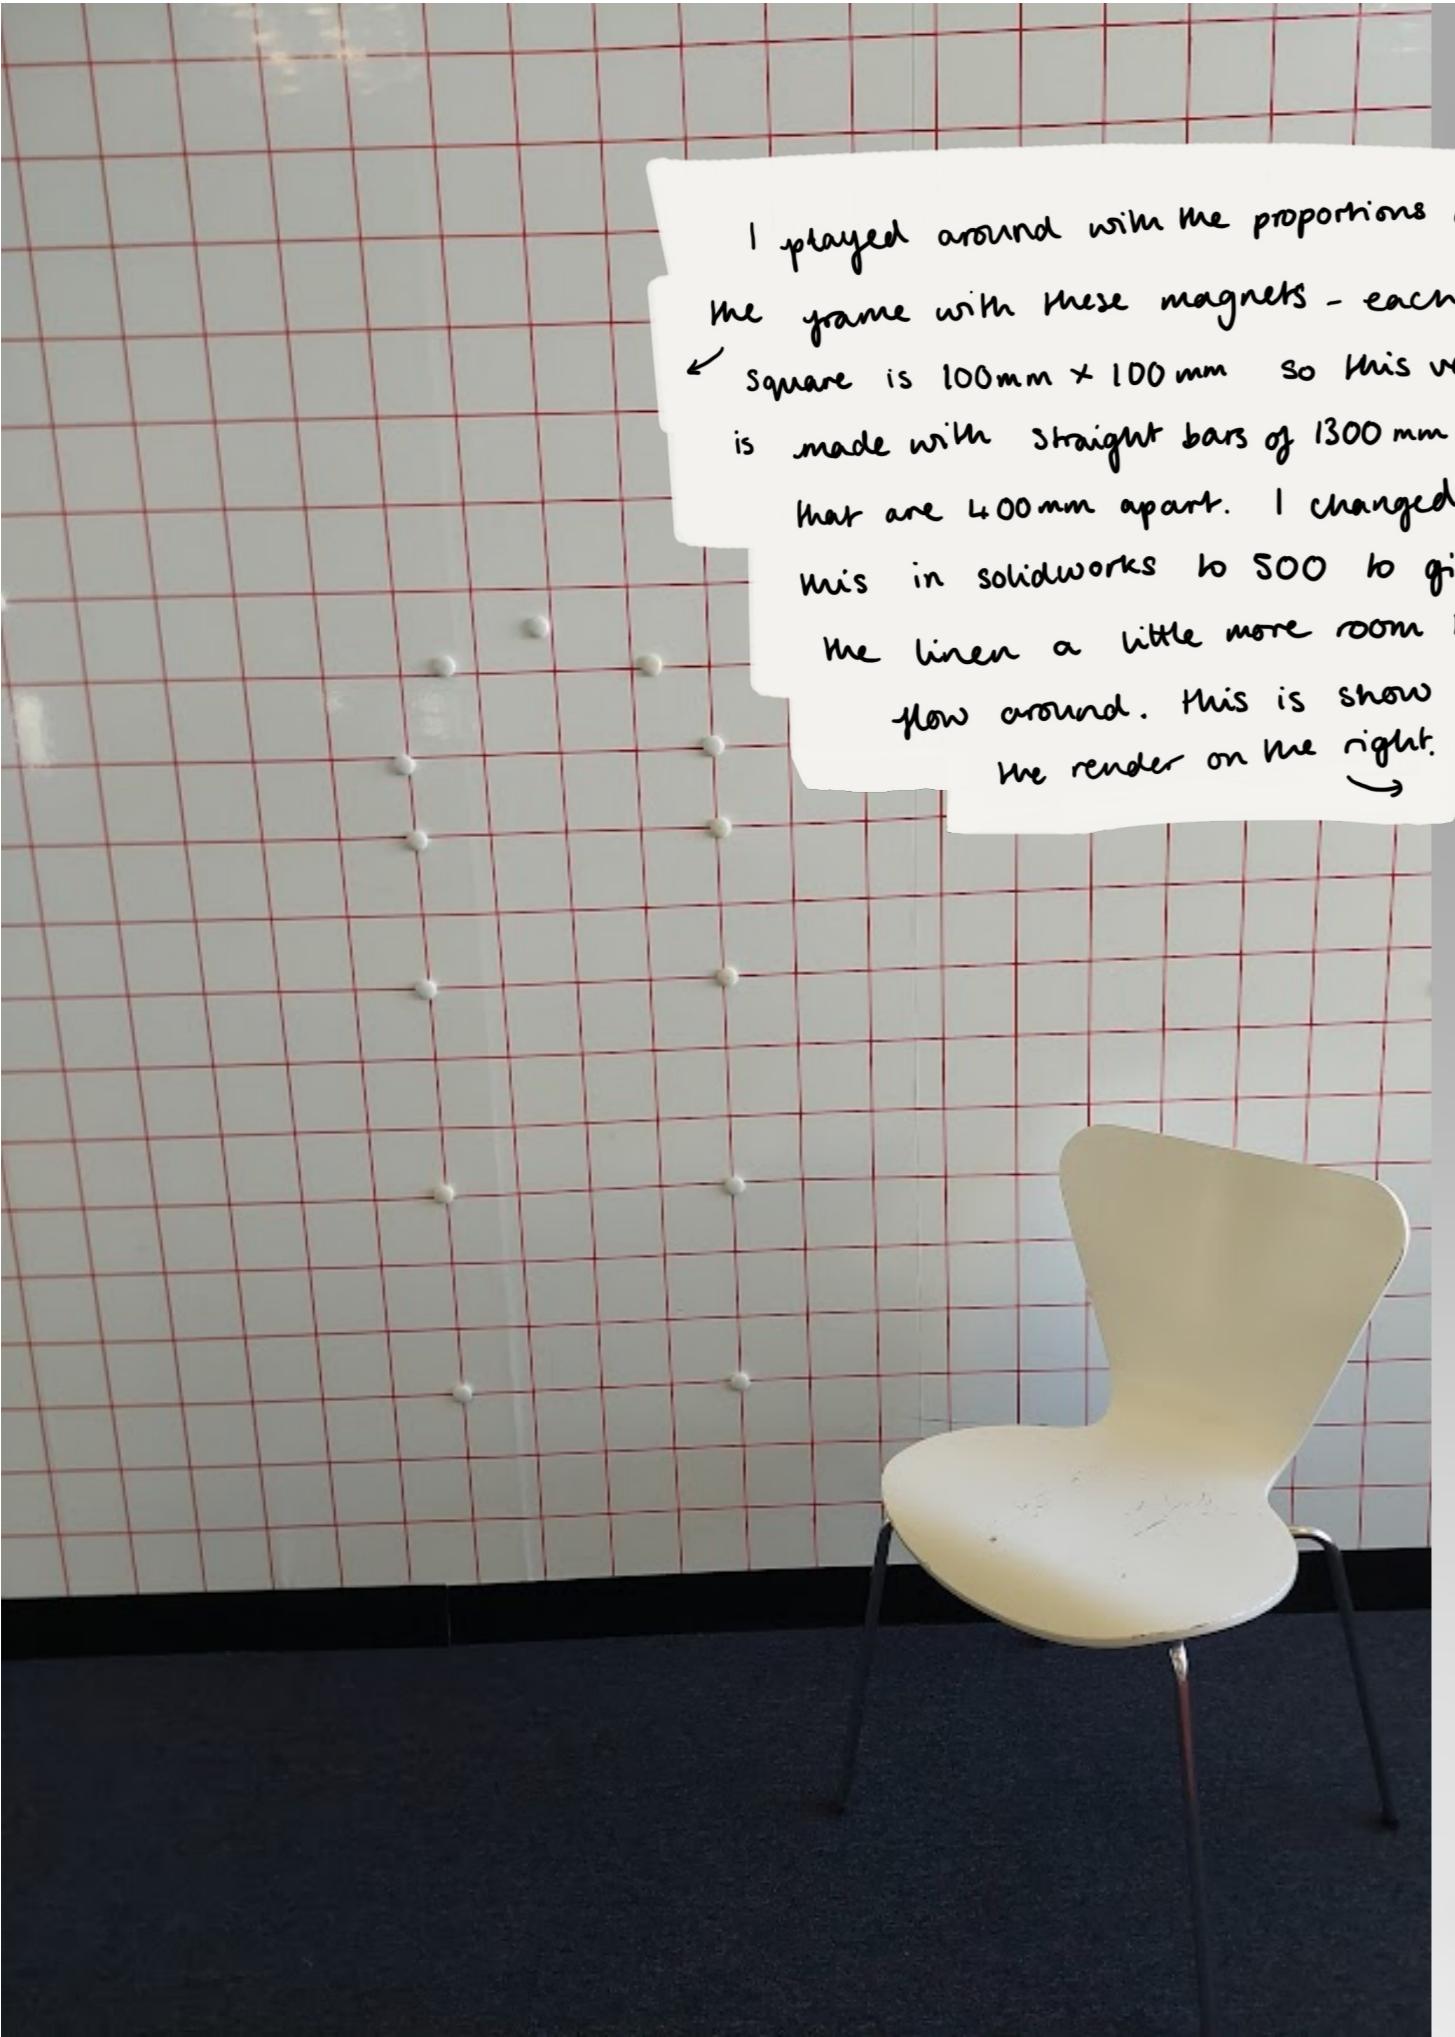

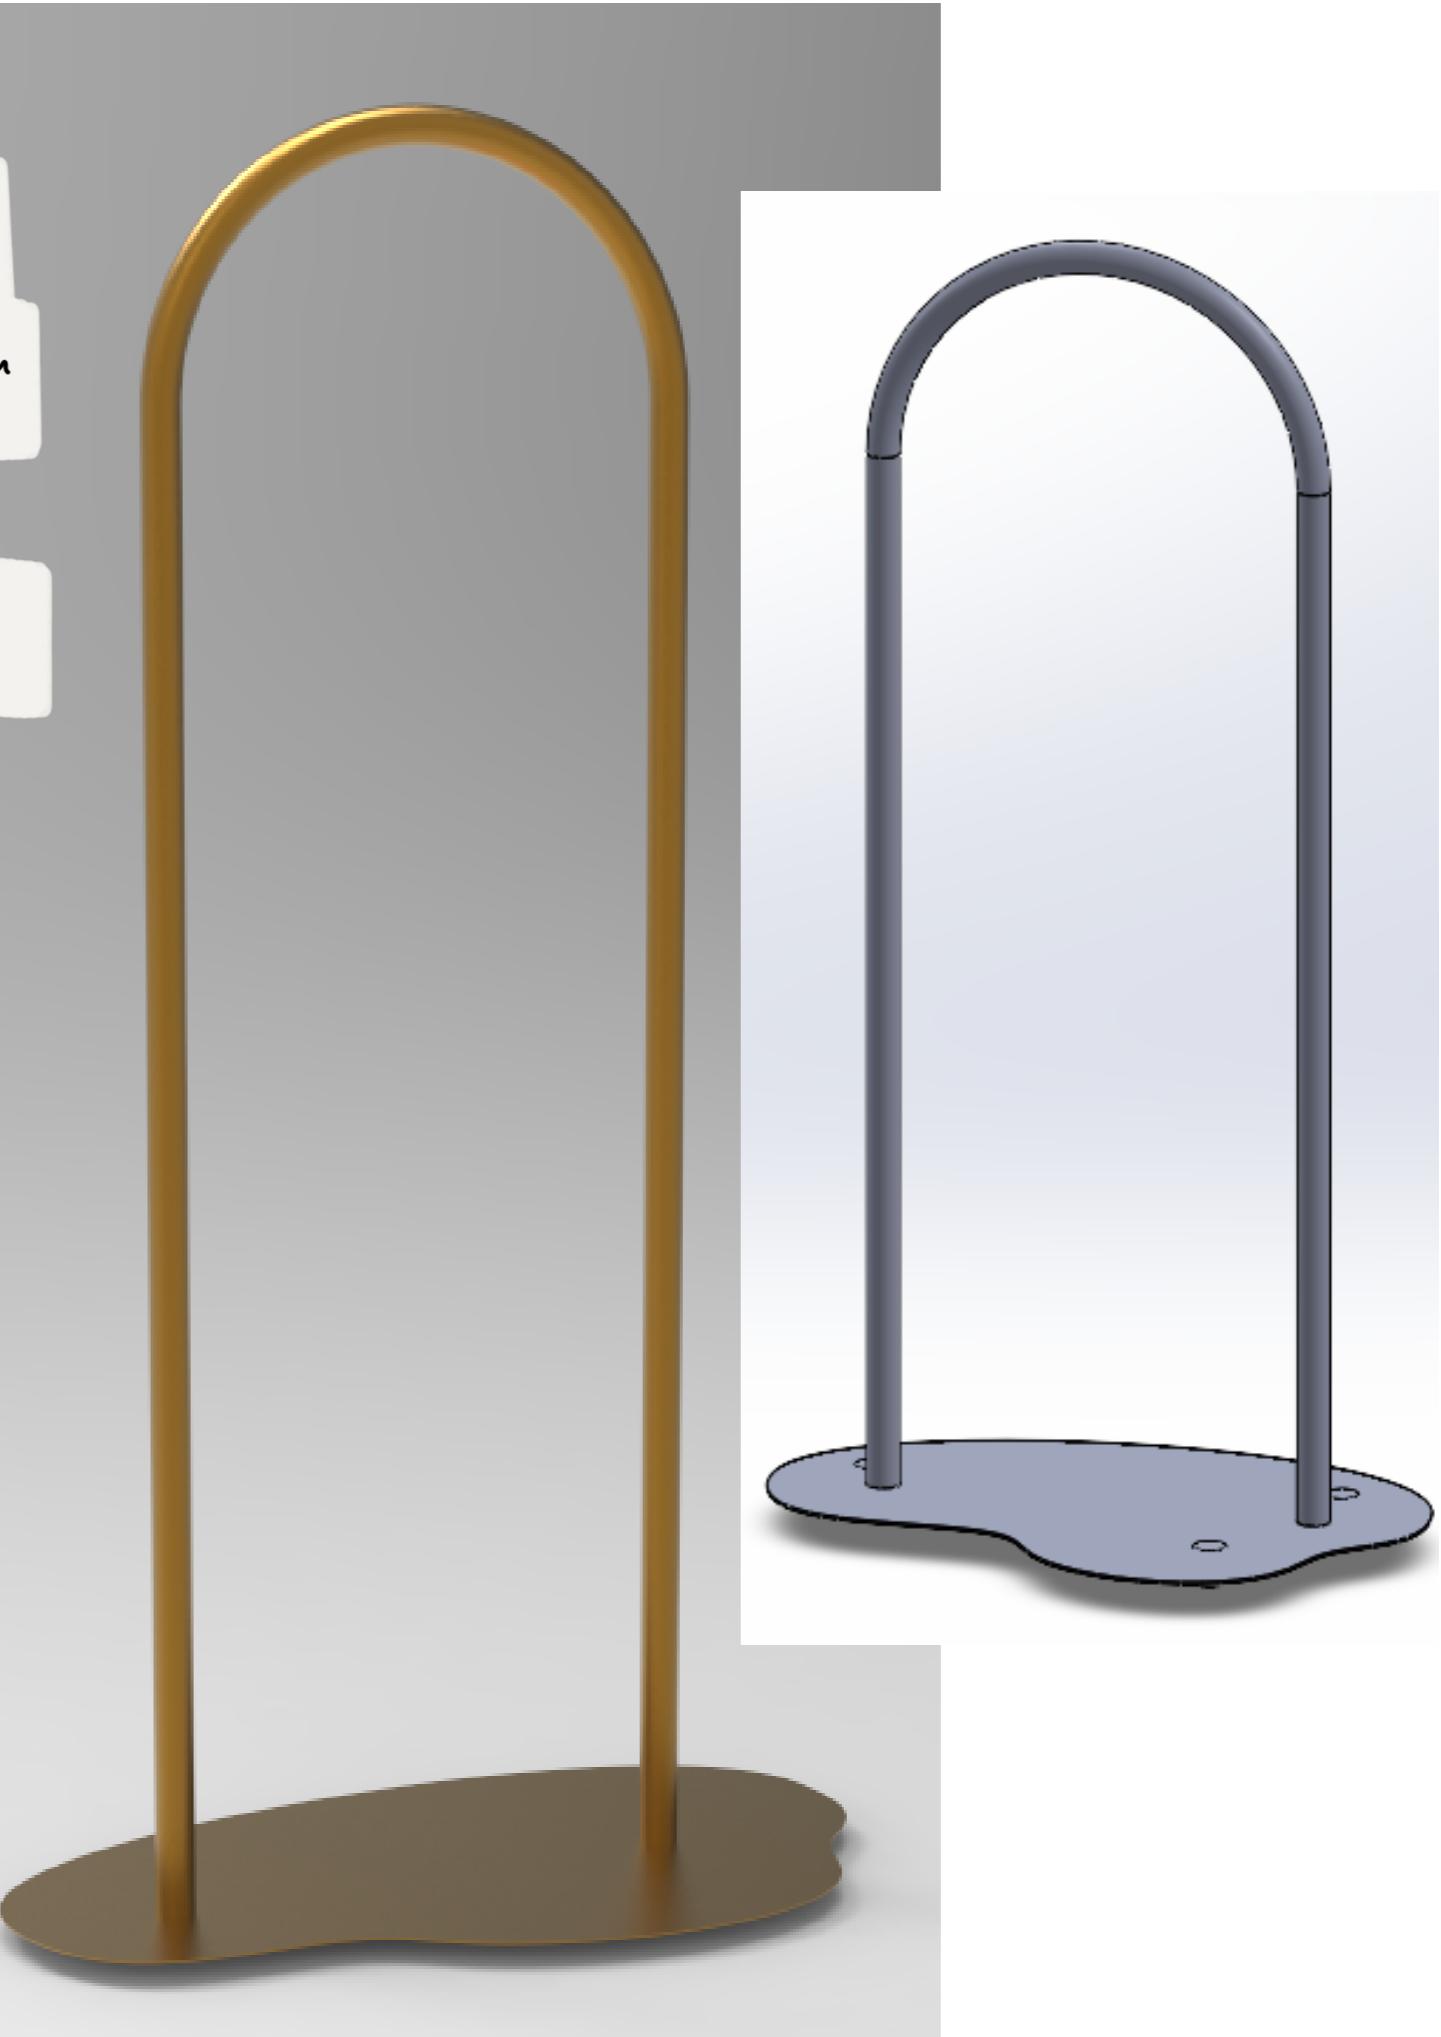

Force ↓ = grain direction ↓

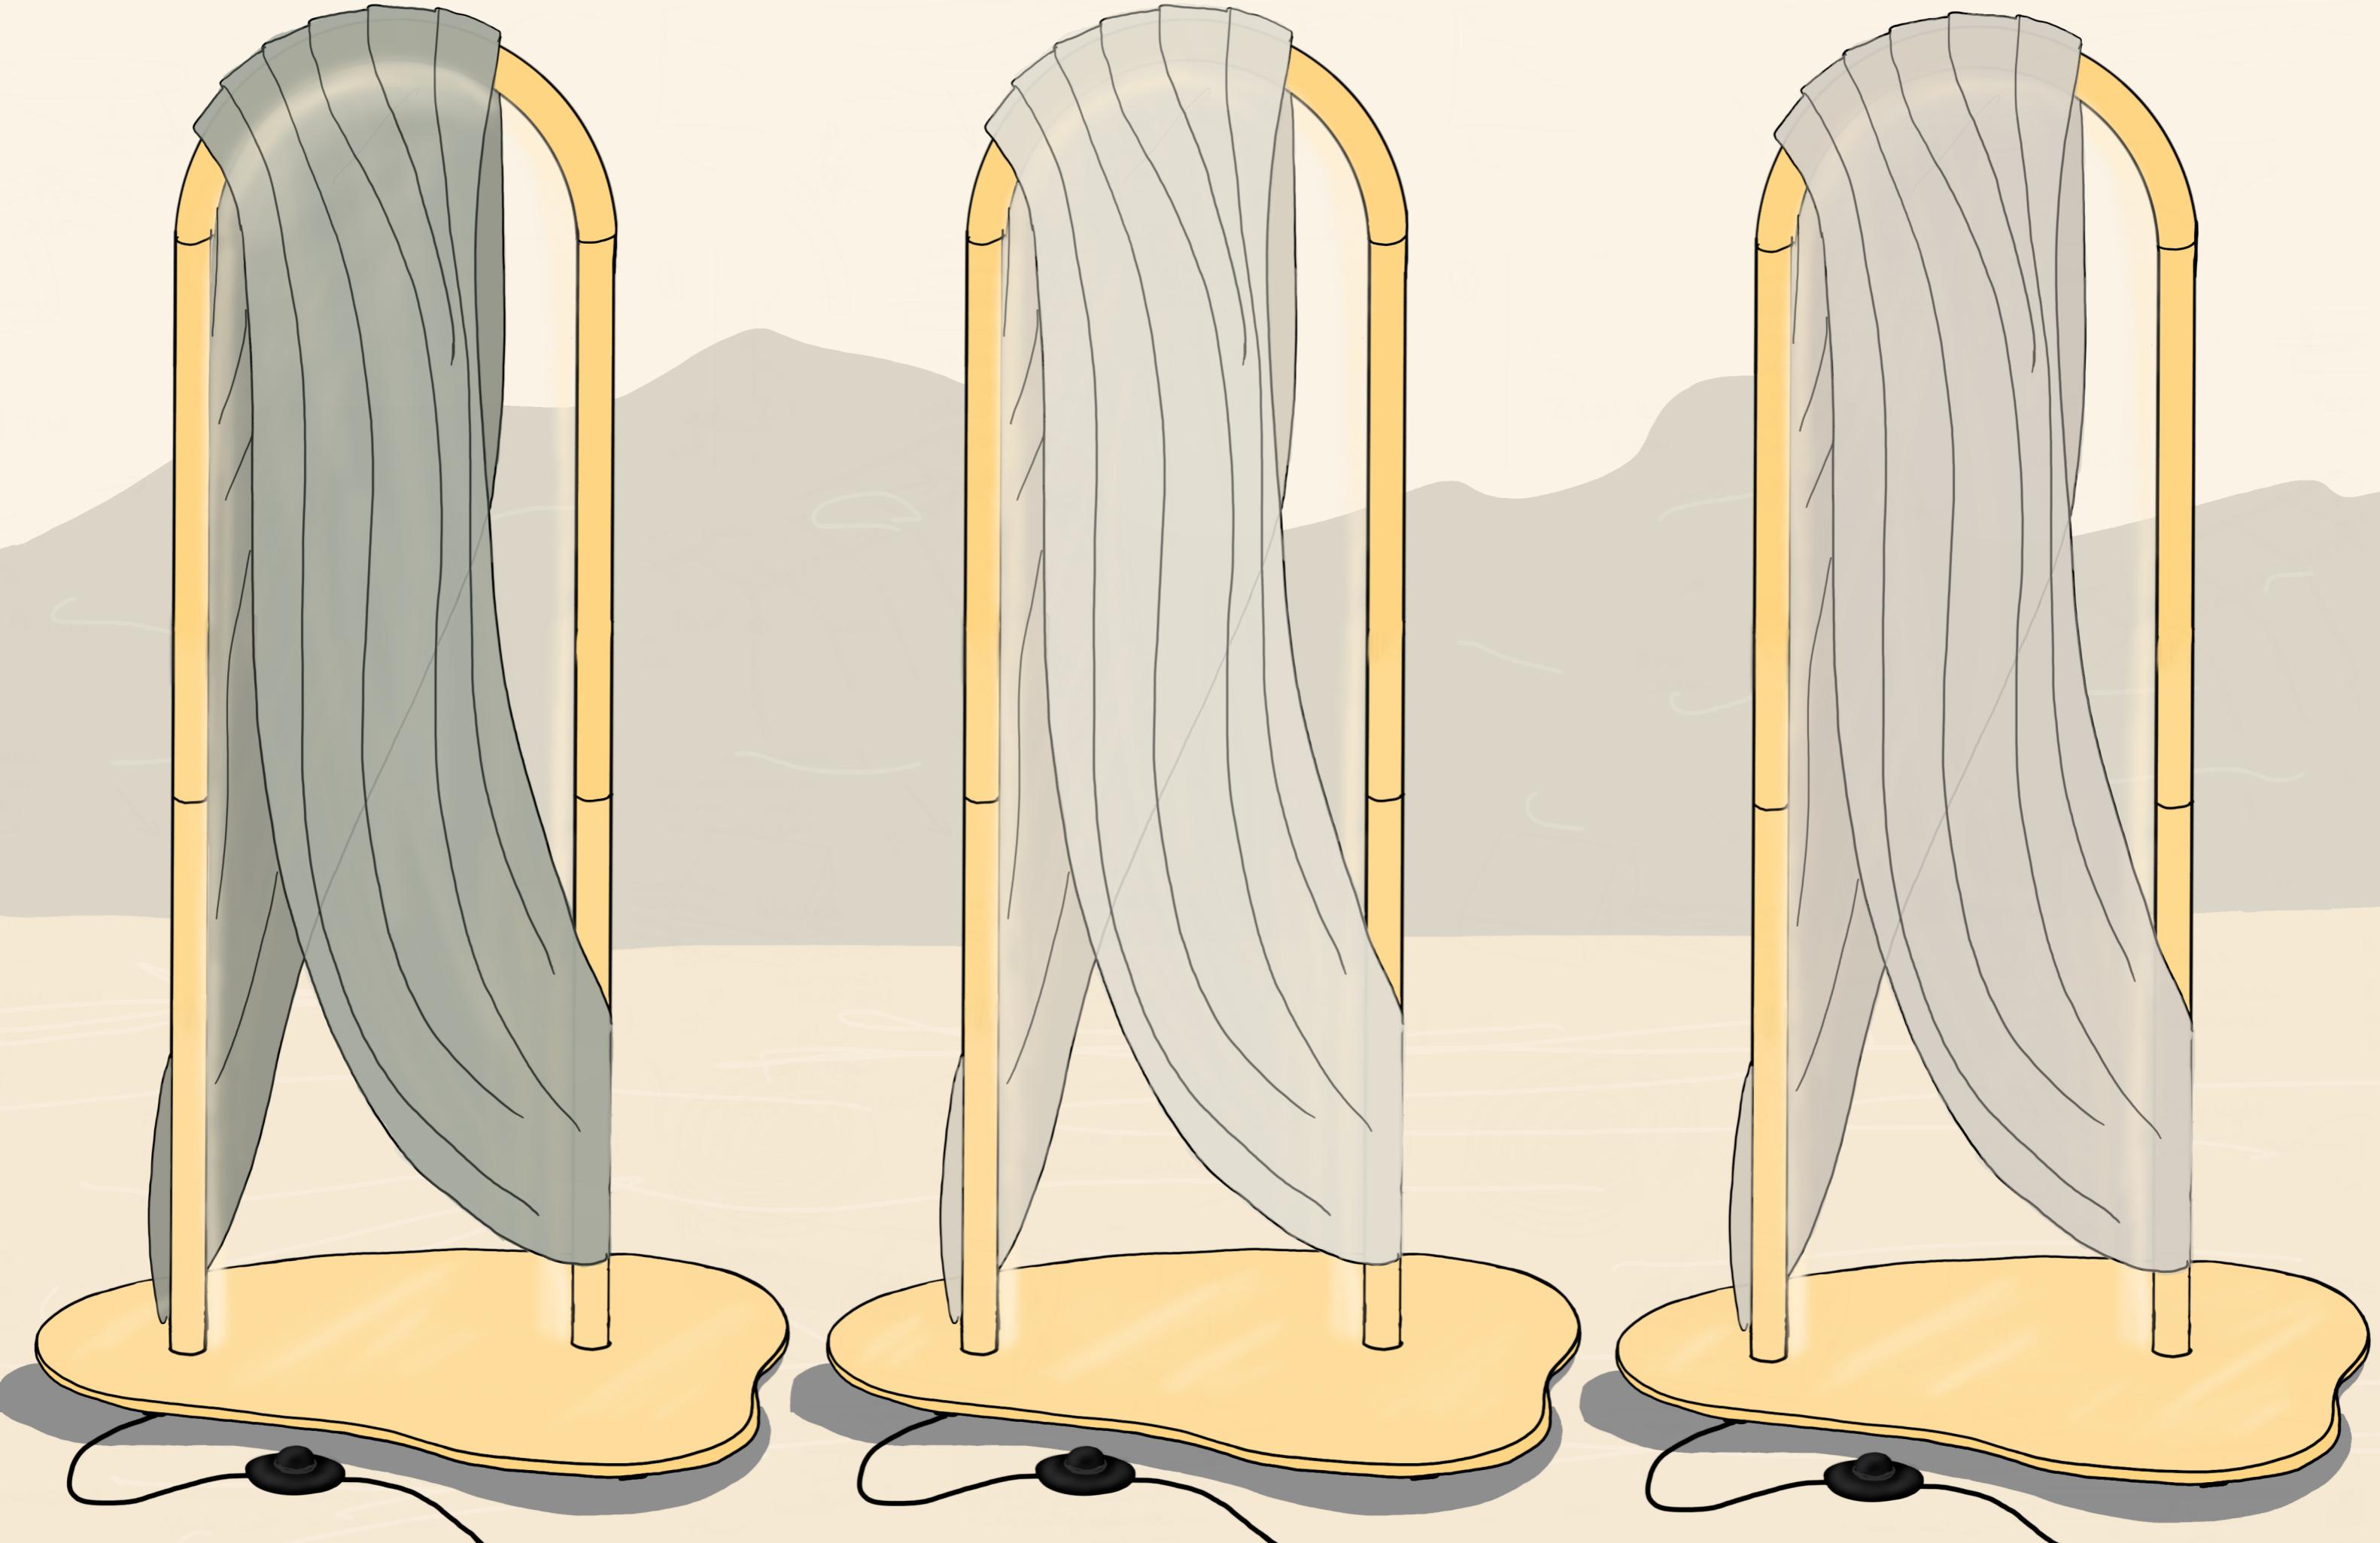

Felt pads would be made in-house as they could simply be punched out of a sheet of felt and glued on with an eco-friendly adhesive.

I played around with the proportions of the frame with these magnets - each square is 100mm x 100mm so this version is made with straight bars of 1300 mm that are 400mm apart. I changed this in solidworks to 500 to give the liner a little more room to flow around. This is show in the render on the right.
